

WITTENSTEIN SE at sps ipc drives 2018

Focused on your needs

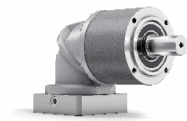

WITTENSTEIN SE's clear focus on technical solutions – in all their complexity – will be at the center of the Group's exhibit at the upcoming "sps ipc drives" from November 27 to 29, 2018 in Nuremberg. Among other things, WITTENSTEIN's various Business Units create user and application-specific solutions by consistently modularizing components and systems, through end-to-end project support combined with a high level of vertical integration and by implementing innovative and sustainable concepts in the fields of mechatronics and connectivity.

WITTENSTEIN alpha GmbH, for example, will be unveiling the new CP gearboxes in the alpha Basic Line along with the new, space optimized right-angle stages for both this series and the alpha Value Line. The stylish bevel gear stage, designed for use in tight mounting situations, impresses with compactness and high efficiency. Owing to the market-compatible output interfaces, the extensive range of possible coaxial and right-angle versions is suitable for a wide variety of tasks.

The further expanded, industrial grade toolkit for small servo drives – the cyber® dynamic line in combination with the cyber® simco line with the fieldbus interfaces PROFINET RT/IRT, EtherCAT, Sercos III, EtherNet/IP and CANopen – means that more than 12,000 different customer and application-specific motor-controller combinations can now be configured. If this is not sufficient, **WITTENSTEIN cyber motor GmbH** can seize the opportunities afforded by high vertical integration to develop customized solutions with customer-specific motors and thus deliver the right customer value without any design limitations – whether for standard applications or for extreme environments.

September 26, 2018

WITTENSTEIN develops customized products, systems and solutions for highly dynamic motion, maximum-precise positioning and smart networking for mechatronic drive technology.

The exhibits presented by WITTENSTEIN Start-up **Galaxie** Systems will demonstrate not only the Galaxie® gearbox's technology lead and its superiority on principle but also its unmatched useful and service life, which is one reason why it has been nominated for the Deutscher Zukunftspreis 2018. With four variants and five different sizes, the modular portfolio provides maximum flexibility for applications with special performance or installation requirements.

In keeping with the motto "Focused on your needs", WITTENSTEIN will be offering a guided tour at the booth on the subject of **Smart Connectivity**: more and more companies are meanwhile recognizing the need for intelligent connectivity solutions, which are a vital prerequisite to cutting-edge automation.

Information for the trade press at sps ipc drives 2018

Trade press representatives are cordially invited to pay a visit to the WITTENSTEIN booth in Hall 4 (Stand 221). Experts from our various Business Units are looking forward to meeting you and to answering your questions. A press kit with current product press releases is available.

Texts and photographs in printable quality can be downloaded from presse.wittenstein.de.

WITTENSTEIN SE – one with the future

With around 2600 employees worldwide and sales of €385 million in 2017/18, WITTENSTEIN SE enjoys an impeccable reputation for innovation, precision and excellence in the field of mechatronic drive technology – not just in Germany but internationally. The group comprises six pacesetting Business Units with separate subsidiaries for servo gearboxes, servo actuator systems, medical technology, miniature servo units, innovative gearing technology, rotary and linear actuator systems, nano technology and electronic and software components for drive technologies. Through its 60 or so subsidiaries and agents in approximately 40 countries, WITTENSTEIN SE (www.wittenstein.de) is additionally represented in all the world's major technology and sales markets.
